

The regal way for presentations

expolinc® **ROLL UP**
CLASSIC & PROFESSIONAL

Colour: silver or black

The graphic is protected inside the housing

You can choose from four widths

Attractive design and stable

Popular: Roll Up Classic

Roll Up Classic – for years now the classical banner system favourite. Quick set-up and dismantling in seconds and easy handling have made it the No.1 system.

The Roll Up Classic spring roller mechanism is extremely hard-wearing and won't let you down even after frequent use at trade fairs. Thus your graphic is constantly protected on the system's springs. Changing the graphic is easy and extremely cost-effective.

Two profile sections allow all materials to be used: The aluminium slide-in profile firmly secures all roller panels and the screwable clamp profiles for cloth banners ensure absolute flatness of your printed panel.

All system parts are carefully processed and specially designed for continuous use at trade fairs, exhibitions and presentations. They are also subject to the "Expolinc lifetime guarantee" that takes care of all your worries should a replacement be necessary.

Regal: Roll Up Professional

Roll Up Professional, the new member of the Expolinc banner family, is based on the proven properties of the Roll Up Classic System.

Roll Up Professional opens up a whole new era in banner display systems: The high-quality, double-coated finish in stylish silver, together with its attractive design, displays your message to the best possible effect.

Technical details, such as self-centring poles, the "click and open" system and adjustable bases under the system set absolutely new standards in presentation technology. The lifetime guarantee goes without saying.

The double-sided version of the Roll Up Professional System is an added attraction: Two graphics in each system lend weight to your message. After all, two is always better than one!

Also available as a double-sided version

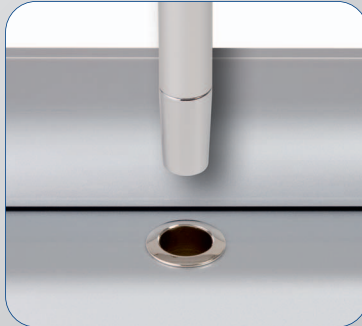

Roll Up Professional, here the double-sided version, in stylish silver

Just a click underneath to replace the graphic

Roll Up Professional:
Just a few turns to change the banner
